

Connect with Nature with the Nature Trust this Year

June 5, 2017 [Halifax] – In celebration of World Environment Day, the Nova Scotia Nature Trust encourages you to get outside and connect with nature this year.

The theme of this year's World Environment Day (a UN initiative that promotes action and awareness for protection of the environment) is reconnecting with nature and celebrating the places that are most important to us.

In Nova Scotia we are lucky to have an incredible diversity of plants, wildlife and landscapes. For many Nova Scotian's and visitors it is our rich natural beauty that deeply connects us to this place – it inspires us to travel here or is the reason why we choose call Nova Scotia home. With beautiful natural places never too far from our doorstep, it may be easy to say that we are connected with nature and Nova Scotia is important to us. However, no matter how much you have explored or may know about our province, it is possible to discover new special places, unique wildlife or landscape that you have not heard of or seen before.

The Nature Trust's *Connecting with Nature* events series provides Nova Scotians and visitors with unique opportunities to explore conservation lands protected by the Nature Trust.

What better way to celebrate our incredible natural resources than to discover them for ourselves and learn more about them? If you're a supporter of our work, this is a wonderful opportunity to see the impact that you are having on conservation in Nova Scotia, and to visit some of the special places that you have protected.

Our *Connecting the Nature* events range from wilderness hikes, to paddles in the 100 Wild Islands, to birding trips and moonlit snowshoes. The next event coming up in our series is on June 18th, a hike and paddle exploring the stunning 100 Wild Islands and visiting the Shelter Cove Wilderness Sanctuary.

For our full list of events please visit [here](#).

Whether you choose to join us, or explore for yourself this year, connect with nature in Nova Scotia and be sure to visit a part of Nova Scotia that you haven't discovered before.
